PROGRAM

The guest speaker was street photographer Melissa Breyer. Ms. Breyer mainly works in New York and especially Central Park where her work features motion, action, and plays with shadows and interesting light. She reports that the light in downtown NYC is wonderful and capturing reflections from surfaces like glass, abstract people, objects and human silhouettes are some of the elements she works with. Capturing the mood of her subjects is a key feature of her work and she looks for elegance in the subjects. She said that she doesn't need to get permission from her subjects and that she favors black and white over color. Her website is www.melissabreyer.com
