Anton Dworak  
August 14th

John McLean  
August 16th

Erik Nelson  
August 26th

## Anniversaries

Kirsten Pellicer  
August 18th

3D printing ♦ in the automotive, aerospace, medical fields, for example, printing skin grafts. Items are being built that have never been built before using 3D printers. The technology gives the ability to answer the question, ♦What is the strongest way to make something with the least amount of materials? ♦

3D printing has 7 different categories of types of 3D printers. An FDM printer fuses plastic. A stereo lithography uses light on light-sensitive resin to harden it in place. First, you have to design the product in a computer before printing.

How does Tim use 3D printers? He takes some of his larger sculptures and makes them smaller on a 3D printer for people.
