

Dear Evening Rotarians,

I have struggled with this "pmail" program for three weeks now, trying to get a handle on this weekly letter to our membership. I finally had the sense to write down the necessary steps for composing and sending the letter. One would presume that the problem was solved.

One would be wrong.

I wanted to double check some information in another part of DACdb, so I clicked on it, and when I came back to the pmail, it was gone. New lesson related to pmail: once I begin composing it, I better finish it and send it, or plan to start over from the beginning. In order words, have all of the information at hand before I start.

So . . .

We had a lovely installation dinner last week at Capitol Plaza, attended by 30 people. As a prelude to the installation, we were happy to welcome Yurick Griggs, our newest member.

This week, July 16, our speaker will be Kim Slaughter who will be talking to us about Riverbend Density.

Greeters are Suzanne and Pam, and snacks will be provided by Frank.

As a "heads up" reminder, next week, July 23, snacks will be provided by Roger, and Kerri and Carol will be greeting people as they arrive.

Our speaker on July 23 will be George Laur, who will tell us about the Citizens Climate Lobby.

Remember, guests are always welcome.

See you tomorrow evening at 5:30.

Carol
