## Dream On

Some people think daydreaming is a waste of time, but it can be a powerful tool for sharpening your creativity. Entrepreneur magazine website spells out why:

- **Motivation.** Daydreaming about something you'd like to do can increase your motivation to go out and pursue your goals, and also helps structure your thoughts.
- **Visualization.** Use your daydreams to go into detail about your goals so you can identify possibilities and options. You can mentally narrow down ideas.
- **Problem solving.** You can't always attack a problem with logic and brute force. Spend some time letting your mind roam. Daydreaming relaxes you and reduces stress, so it might help you spot a solution you'd otherwise miss.
- **Productivity.** This may seem counterintuitive, but daydreams can help you focus. By daydreaming about a problem or opportunity, you give your brain a chance to concentrate on your goal without clutter or pressure from the world around you.

### The Final Note

The great composer Igor Stravinsky once wrote the music for a ballet.

According to one story, after the ballet opened, a dancer sent Stravinsky a telegram: "Ballet great success, but if you would allow the violin to play the solo instead of trumpet, it would be a triumph."

Stravinsky, known for his dry sense of humor, cabled back: "Satisfied with great success."
