“People do not consciously and rationally choose the form of their society. Societies develop through processes of social evolution that are not under rational human control.”

- Ted Kaczynski: Industrial Society and Its Future (1985)

Did you know: The (Old) London Bridge used to have 200 buildings on it. Because of this, it collapsed many times, and people would often get killed in fires because they had no escape. The collapses are the basis for the children’s song “London Bridge Is Falling Down.” The current London Bridge was built in 1973, with the previous bridge lasting from 1831-1968.
