

Rotary Club Zapopan presents the project:

*Dry Toilets for  
indigenous communities  
GG 2235574*

**Did you know that by the end of this year there will be about 300 cases of dysentery on the community of “Las Guayabas” due contaminated water?**

# About “Las Guayabas”

"Las Guayabas" is a Wixarika indigenous community located in the northern highlands of the state of Jalisco.

- Distance to the Nearest City: 8 hours.
- Number of persons in the community: 180
- Number of cases of dysentery per year due contaminated water: 300

# Problem

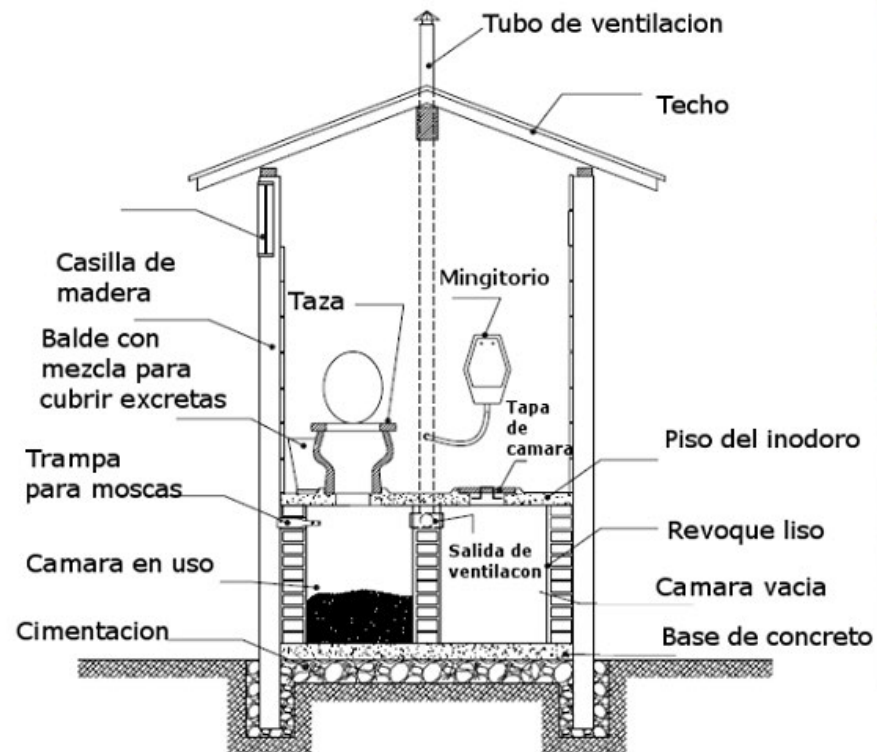

Families in the community do not have toilets or water in their homes. Derived from the above, much of its fecal waste ends up in nearby rivers.

# Solution

Implement dry toilets in the community that can operate without water

The members of the community will help with the labor to build the dry toilets.

# Solution

We already build a prototype of a dry toilet that is working

# Our Goal

## Project Goals

- Build 30 dry toilets in the community in order to decrease dysentery cases in 80 %.
- Provide environmental care and hygiene workshops to people in the community in order to help sustainability long term.
- The members of the community will help with the labor to build the dry toilets.

## Rotary Areas of Interest we are covering

- Prevention and treatment of diseases
- Water, sanitation and hygiene.
- Environment

**Total Budget:**  
**US\$56,248 dollars**

→ 75 % is what we are asking as an external support

→ 25 % will be provided by our club

# Unit Costs per dry toilet
