Community Needs

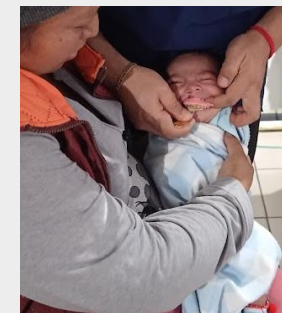

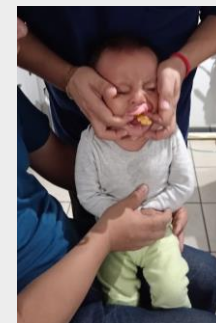

APPROXIMATELY 1 IN EVERY 700 CHILDREN BORN ALIVE SUFFERS FROM CLEFT LIP AND/OR PALATE; IN THE STATE OF MEXICO APPROXIMATELY 90 CHILDREN ARE BORN A YEAR WITH THIS CONDITION

THE CLINIC STARTED ACTIVITIES IN JULY 2023, APPROXIMATELY 70 PATIENTS FROM BABIES TO ADULTS HAVE BEEN TREATED

THE XALOSTOC ROTARY CLUB CARRIED OUT AN OPERATIONS CAMPAIGN IN AUGUST OF THIS YEAR

- WE RECEIVE MORE THAN 200 REQUESTS FROM PATIENTS WHO DO NOT RECEIVE ANY TYPE OF TREATMENT
- 47 WERE ACCEPTED, OF WHICH 35 WERE OPERATED
- 11 BABIES FROM 1 TO 15 MONTHS, WITHOUT ANY SURGERY, WHO UNDERWENT PRE-SURGICAL ORTHOPEDICS IN THE CLINIC (TAKING MODELS OF THE MAXILLARY PROCESS).

Community Needs

- WE DETECTED THAT MANY PATIENTS HAD CAVITIES AND THOSE WHO WERE TREATED IN PRIVATE DENTAL OFFICES WERE TRAUMATIZED, MAKING IT MORE COMPLICATED TO TREAT THEM, THESE TREATMENTS WILL BE DONE IN THE CLINIC

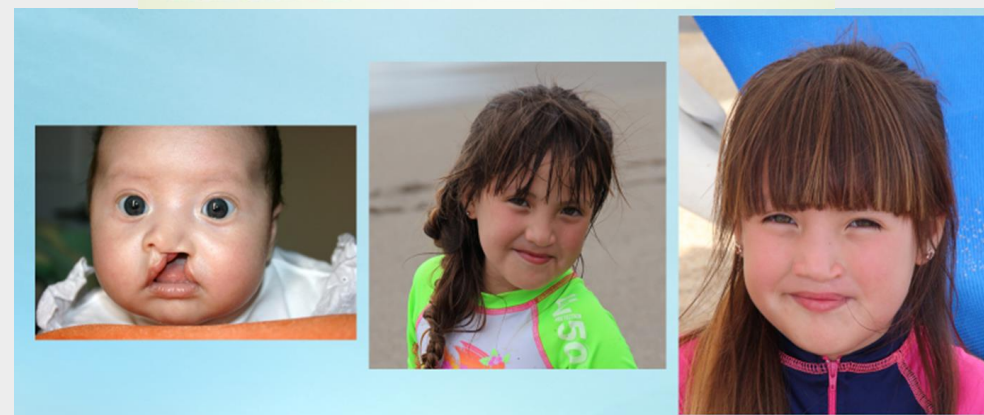

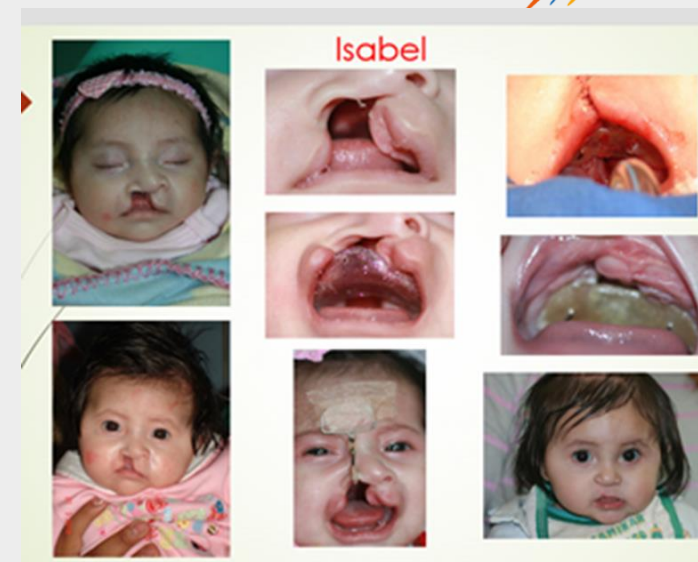

- OTHER PATIENTS UNDERWENT SECONDARY SURGERIES TO IMPROVE THE AESTHETIC APPEARANCE OF THE LIP AND/OR PALATE TO IMPROVE SPEECH

- AFTER SURGERY, THE USE OF THERAPEUTIC LASER IS RECOMMENDED TO MINIMIZE SCARRING

- WE ARE CONVINCED THAT IT IS NECESSARY TO REINFORCE AND UPDATE THE KNOWLEDGE OF THE CLINIC STAFF IN ORDER TO BETTER TRAIN STUDENTS AND OFFER THE HIGHEST QUALITY CARE

Global Grants - Area of Focus

Sustainability

WITH THE IMPLEMENTATION OF THE CLINIC IN JULY 2023, WE STARTED THE DENTAL, PSYCHOLOGICAL AND SPEECH THERAPY TRATAMENTO OF PATIENTS WITH CLEFT LIP AND PALATE
