This Week's Meeting

Our speaker this week is Rotarian **David Dalton** discussing the "**Biology of Lewis and Clark**" interpreting the expedition's findings from a modern perspective to show how advances such as DNA research, modern understanding of proteins, and the latest laboratory methods shed new light on them. David's book (available on Amazon) recounts the expedition's observations and, in clear, readily accessible terms, relates them to principles of ecology, genetics, physiology, and even animal behavior.

The students and staff were very appreciative for the breakfast Rotarians served at the StepUp school on January 14th. Kudos to Jem Parro for her leadership with this wonderful event, showcasing the fellowship spirit of Rotary and "Service Above Self". Check out the [VIDEO](#).
