2018 Synopsis ❖ it is disappointing that the number of cases of Polio increased in 2018, however it is not all bad news. Polio

teams have dramatically increased their surveillance efforts in order to detect every case of Polio. Then vaccination teams are rushed in to stop the outbreaks. This means that we are finding cases of Polio that might have been missed in previous years. It was also good news that no cases of wild Polio have been detected in Nigeria in over 2 years.
