

Project of the Kyiv rotarian humanitarian hub (Rotary Club Kyiv-Sophia)
"Workshop of the Future".

We took into account the great demand from children and their parents for workshops, educational games and quests, new educational products, art therapy, and psychological help.

They decided to continue working with children and their families in these directions.

The categories of participants are school-age children and their families.

We have good case studies from our classes:

1. A holiday for pregnant mothers who stayed in the city during the offensive on Kyiv, while their husbands defended our country. There were 78 participants.
2. Master - classes on painting ceramic angels and painting bells.
3. A holiday for 121 children from Borodyanka- theatre, concert with famous singers, etc.
4. Psychological counseling of mothers whose husbands were destroyed by the occupiers in front of their families.
