

## Humanitarian project "EVACUATION 200"

During hostilities, as a result of the military aggression of the Russian Federation, a large number of bodies (remains) of the dead remain directly at the sites of hostilities. There was a need to identify and further bury the dead. Members of our Rotary Club "Odessa Sea Energy" with Military Historical Center "Memory and Glory" (Odesa, Ukraine) participate in the humanitarian project "EVACUATION 200". The center has been operating since 2007 and has extensive experience in field research, including excavations at World War II battlefields.

The specificity of searching for the remains of the dead is greatly complicated by the fact that the trips made during the rotation have a large geography. Our activity is systemic in nature. Fighting is taking place in many regions of Ukraine, of varying intensity, which also strongly affects the further search for remains.

To implement the humanitarian project "Evacuation 200" in the frame work of 4 rotations of groups of searchers of 12 people:

### Automotive equipment

Cars with a body type "Pickup" with four - five-seater interior, diesel engine (Toyota Hilux, Mitsubishi L-200) - 1 pcs., - **20 000 USD**

Auto-refrigerator (Mercedes-Benz, Volkswagen) – 1 pcs., - **20 000 USD**
