

On the protection of the future!

The Project of Poltava Rotary Club

“1:1” strategy. Provide every student with an innovative device (laptop, tablet) for having opportunity to study online withing martial law”

Relevance:

Hundreds of schools are completely destroyed in Ukraine now, and hundreds of cities are under constant shelling. Hundreds of thousands of children can't study because of a lack of elementary conditions and technical devices. The goal of Rotarians is to protect the future, provide access to knowledge and provide the opportunity for continuing education.

Actions:

There are online platforms in Ukraine, where children can continue their education. Online education is justified during the war – we need to protect children, to support their psychological state and intellectual development. But children need help with the technical side – getting a gadget for use. The goal of the project is to provide each student with a technical device - a laptop or a tablet. Currently, more than 5,000 children who escaped the war need such help only in Poltava and Poltava region. More than 7,000 children are from needy families who lost their income due to the war. They also need support.

Results:

Using modern technologies as a tool to achieve educational goals anywhere and anytime.
Creating a personalized approach to studying,
and discovering the creative potential of each student.

Dear friends!

**The children of Ukraine need your help.
We will be very grateful for your support.**

**We will win. Parents will just love again.
Schools will teach. The future will be saved.**
