

Bring in your old jeans. Cub Scout Pack 263 will turn them into insulation for Habitat For Humanity*

Williamston Pack 263

Together with Cotton's **Blue Jeans Go Green™** program, recycling denim and reducing textile waste is easy, and it's **FREE!** Denim is made mostly from cotton, a sustainable fiber, which can be broken down to its natural state and transformed into something new. By diverting denim away from landfills, where it would otherwise join the millions of pounds of textiles thrown out every year, Cotton's Blue Jeans Go Green™ program strives to make the world a little greener.

Make an impact in
your community

Denim collected through the Blue Jeans Go Green™
program is upcycled into UltraTouch™ Denim Insulation.

Specific HFH project is dependent on project application
