Water Ambassadors

J.P. Gellermann, County Extension Director/SeaGrant Extension agent for the University of Florida /IFAS spoke about a new program to educate residents on water quality issues.

JP talked about his efforts working with 4-H members in the county to raise the awareness level of residents to the challenges of our local water resources.

He has led 10 six hour sessions on the topic and has graduated 110 Water Ambassadors in the past year. The group is evaluating all their experiences and information gathered during these sessions to improve and update their programs for 2017.

The program will broaden its efforts in 2017 to work with more volunteers and provide outreach to the community on this important area.

JP can be reached at Martin County Engineering Department at [772-288-5654](tel:772-288-5654) or jpgeller@ufl.edu. Web site is <http://martin.ifas.ufl.edu>.

50-50 was sold by Jack Langhorne and won by President Harry.
