Rotarians hand out new dictionaries to area third graders

Rotary District 6960 is pleased to announce that its member clubs will once again be handing out dictionaries to third graders in Southwest Florida on Friday, October 2 as part of "The Dictionary Project." The Rotarians have taken on the cost and personal time commitment to make these dictionaries available to each of these third graders,

and make a personal difference in the life of a child.

The goal of this program is to assist all third grade students to complete the school year as good writers, active readers and creative thinkers by providing the students with their own personal dictionaries. A dictionary is perhaps the first and most powerful reference tool that a child should own. Its usefulness goes beyond the spellings, pronunciations and definitions it lists. It is also a companion for solving problems that arise as a child develops his or her reading, writing, and creative thinking abilities. Students benefit from an increased self-reliance and resourcefulness inspired by the maxim, "look it up." This is an opportunity for children to expand their vocabulary. In addition to the dictionaries, this year Rotarians will also be handing out copies of the book "The Magic School Bus—linside the Human Body" to all third graders.

Green Path Veterans Farm

Veterans sometimes find it hard to transition back into the routines of life

A year-old Sarasota-based program hopes to make that transition a little easier by getting vets' hands dirty-literally.

The program, Green Path Veterans Farm, was started by the Florida Veterans for Common Sense Fund, says Gene Jones, one of the group's founding members. There was discussion in the group about the importance of local urban agriculture to help cut down on the energy wasted by transporting and importing food from other states and countries. The group also learned that if more food was locally produced, it could have a \$100 million impact on the local economy.

"If we could do just a fifth or a tenth of that," the program could be successful, Jones says.

Members also thought an urban ag project would help train veterans in

Gene Jones and Dr Robert Kluson.
