Project Title: Pelvic Stablization Devices for the Cameron County Ambulance Service

PROJECT DESCRIPTION:

1. Describe the project. What was done, when, and where did project activities take place?

Brought 12 pelvic devices for the CC Ambulance Service. The devices provide circumferential compression to patients with suspected pelvic fractures which may reduce blood loss and pain. Pelvic injury is associated with significant risk of mortality and requires urgent care.

CC Ambulance Service is located in Emporium.

2. Who were the beneficiaries, how were they impacted by this project, and what humanitarian need was met? How many people benefited from this project?

The project will benefit our community/county by having pelvic devices available for their emergency. Our rural ambulance service faces many challenges in raising funds and this will help meet their needs.

Minimum 12 will benefit, can be reuse in certain circumstances.

3. How many Rotarians participated in the project? What did they do? Please give at least two examples, not including financial support provided to the project.

Four Rotarians were involved by contacting the ambulance service on what devices to order, writing the grant, follow up after approval of the grant, presenting the check and writing a article for the newspaper.

Fifth Rotarian, who recently joined our club and is a EMT with the ambulance service, demonstrated the device at one of our meetings.

4. If a cooperating organization was involved, what was its role?

None
