Rotary Club: Rotary Club of Keyser

Project Title: Fountain School Play Area

PROJECT DESCRIPTION:

1. Describe the project. What was done, when, and where did project activities take place? Fountain Primary, one of several primary schools located in the geographic area that the Rotary Club of Keyser serves, had an issue with kids being able to play outside when it was raining--they had no covered play area. The need to be able to get kids outside, especially at the primary school level, has been proven to increase academic performance and focus. The Rotary Club of Keyser stepped in

2. Who were the beneficiaries, how were they impacted by this project, and what humanitarian need was met? How many people benefited from this project?

The beneficiaries of the project are both the teachers and the hundreds of kids that come through Fountain Primary School. Not only will this allow more chances for the students to be outside, it will also provide an area teachers can use for outdoor classroom settings during the warmer weather. It's tough to count how

3. How many Rotarians participated in the project? What did they do? Please give at least two examples, not including financial support provided to the project.

5 Rotarians participated in helping prepare the area where the concrete pad would be poured for the recreation area. Our club is a much older club, and the physical nature of this project prevented many members from being able to participate "hands-on."

4. If a cooperating organization was involved, what was its role?

Fountain Primary School, who gave us the blessing to complete the project.
