*Did you know: Blackwater rivers occur in swamps. It is a normally non-moving body of water that breaks down organic matter over time. They are called “black” because the tannins from the leaves stain the water black (the same way tea does) and turns it acidic. An example is the brook at Silver Sands State Park at 41.201553, -73.078032.*

Outstanding Do-Good Bets:

Mark vs Win Jr. - \$50 better by end of year record- Red Sox vs Yankees.
