

THE THRESHER

The Rotary Club of Welsh Newsletter
Established – June 5, 1936

November 10, 2022

**IMAGINE
ROTARY**

**Rotary International President
Jennifer Jones**

**District Governor
Tim McNabb**

2022-2023 Club Officers

**President
Arlene Heinen**

**President Elect
Shelly Hay Leblanc**

**Secretary Treasurer
Bernadine Daboval**

Make-ups

Club Members are encouraged to make up meetings at the above clubs, to promote fellowship and increase attendance. If you are traveling out of the area, ask JIM or BECKY to locate a club for you in your area of travel.

Today's Program
Christy LeBleu
Mobile Imaging

THE HARVEST

Christy LeBleu will speak today about Mobile imaging. When people hear the world mobile imaging, they typically think of portable X-Ray imaging. While this service still makes up a large part of the technology, mobile imaging providers now offer more comprehensive imaging services, such as ultrasound and EKG.

Math Night at Welsh Elementary brought together families, Welsh Rotary, and local businesses to celebrate math on Monday. We served pizza provided by Hunt Brothers and prepared by 90 One Stop, along with chili dogs, salad, cookies and beverages to more than 200 parents and children, after which all went to the gym to enjoy math games and exercises.

This event typified the spirit of Rotary, drawing together the strength of the business and professional community to support out local youth and families. Thanks to our corporate sponsors and Rotarians.

Mobile Imaging: What????

Cutting Edge Healthcare

With mobile imaging, certified technologists and radiologists go directly to a medical facility, residence or place of business with all of the necessary equipment needed to conduct a variety of diagnostic screenings. The three primary imaging technologies are X-Ray, EKG and Ultrasound, which can be utilized for various purposes:

X-Ray:

- Detect injury to bones, identify bone deformities and verify bone healing.
- Verify placement of other medical devices such as implantable pumps and catheters.
- Detect pneumonia or bronchitis.
- Detect gallstones and kidney stones.

EKG:

- Find the cause of unexplained chest pain caused by a heart attack, pericarditis or angina.
- Find the cause of symptoms of heart disease, such as shortness of breath, dizziness, fainting or rapid, irregular heartbeats (palpitations).
- Check how well medicines are working and whether they are causing side effects that affect the heart.
- Check the health of the heart when other diseases or conditions are present such as high blood pressure, high cholesterol, cigarette smoking, diabetes or heart disease

Ultrasound:

- Identify the presence of abdominal aneurysms
- Detect issues with blood flow, such as arterial occlusion or blood clots
- Identify carotid occlusive disease and carotid artery disease

Detect renal vascular disease, hypertension and early signs of kidney failure
