## Club of Brighton

## Mike Copeland, CEO of Arrington Performance

By George John Moses Jr.

At our October 22nd meeting, Rotary speaker, Mike Copeland, CEO of Arrington Performance in Brighton gave one of the most interesting presentations we've had in a long time. His research on saving the internal combustion engine by adapting it to hydrogen fuel has been written up in national car and business magazines and his interviews and videos are all over social media and YouTube.

His research is aimed at developing conversion equipment that will let your gasoline engines run on hydrogen. Not just automobiles, but any gas engines: weed whips, lawn mowers, diesel engines and more with zero carbon in the exhaust.

In case you missed the meeting or want to see more, here's a link to a short YouTube video about his work.
