4-Way Test Kristina Hill

Program— Cloud 9 Wireless with Landon Saunders

Pictured President Greg Kelso, Owner Landon Saunders, and presenter Rotarian Jason Weaver. Landon did a short presentation on Cloud 9 Wireless and how it started with ABG Wireless roots and is in the process to add Fiber Optics service to Lawrence County. Currently serving from Summertown to Rogersville with their wireless service and are now installing fiber optics in Lawrenceburg to your home at 1 Gbps for \$50 / month and will expand out as this community is completed to the remaining county.

And Jason Shelton of Lorretto Telecom, a Skybest Company

Pictured on the left, Lorretto Telecom Jason Shelton and President Greg Kelso. Jason started his presentation as to why it is taking so long to get the internet to service our county—it's the overall cost. The phone lines were paid for by AT&T years and years ago and have degraded past the point to truly serve the needs of today's digital requirements. Lorretto Telecom has had to re-engineer every aspect of bring this service to the county. They are looking at the long term of 100 to 150 years that this infrastructure will serve. They are a true Fiber Optic provider in which they are bringing this service right to your house. The other competition (AT&T, Spectrum, Etc.) relies on the old copper from the street or local substation to your home. They have packages of 250 Mbps, 500 Mbps and 1 Gbps for their customers. They are using a TN Broadband grant and adding a "New Ring" around the county to draw these services from West Point to Crockett Park to Oliver Springs as they work there way around the county.
