### Columbia County Economic Development

The state of Florida is highly integrated with the global economy – it is both a global economic hub and a growing market itself. Columbia County, Florida is a vibrant part of this economy built on an extraordinary network of federal and interstate highways and railroads that connect businesses here to millions of consumers in local and regional markets and throughout the world from deep water ports on the Gulf of Mexico and the Atlantic Ocean.

Businesses here enjoy some of the lowest corporate tax rates in the country, and their employees pay no state income tax at all. The cost of living here is affordable with a quality of life that offers both rural beauty and easy access to big city amenities.
