Countries in yellow are endemic. ¹Data reported to WHO HQ on 23 Nov. 2021 for 2021 data and 22 Nov. for 2022 data. ²Wild viruses from environmental samples, selected contacts, healthy children and other sources. Last WPV type 3 had its onset on 10 November 2012. ³Between 27 Sep 2015 and 27 Sep 2016, Nigeria was not classified as endemic, and declared Wild polio-free as of June 2020. ⁴Exceptionally reporting case-contact of a positive index case given the date of collection is later than the onset date of the most recent WPV.

Data in WHO HQ as of 22 Nov. 2022
