## Speaker for Monday August 26, 2024 - Copper Bottom Brewery

Founded in Holly Hill, FL., Copper Bottom Craft Distillery brings the craft of distilling back to its roots. From rebel rum runners like Bill McCoy who called our city “home,” to historic Three Chimneys, the site of the oldest sugar plantation and rum distillery in North America. Our brand reflects the thriving operations that were here before us.

Located steps from the Halifax River, our small-batch distillery is named after an 18th century seafaring term used to describe someone who is thoroughly reliable, trustworthy and certain not to fail. Our family is committed to producing spirits that exemplify the Copper Bottom legacy.

?

We produce handcrafted, award-winning spirits with no artificial colors, flavors, or sugars added. Our spirits are made from raw sugar cane, making them naturally gluten free. In addition to our core products, we produce limited edition expressions like our Beer Barreled Rums, Port Finished Rums, Bottled in Bond Rum, and so many more.

A tour with our head distiller will leave you in awe of the art and science behind distilling. He shares hidden truths about the industry and shows you how our production is different - from start to finish. We've been told many times that our distillery tour is among the best in the industry, and we think you'll agree! What is a Copper Bottom?

Copper sheathing was first used by the British Royal Navy in the early 1760s to clad the bottom of their ships. Prior to copper, the ships' hulls were shielded by brimstone, tar and pitch, and then covered with a thin outer layer of wood planking. However, deterioration of the ships' hulls was so extensive, the Royal Navy began experimenting with alternatives.

Results quickly confirmed that cladding the bottom of their ships with copper was the most effective way to preserve the wooden ships. The copper helped prevent barnacles from attaching and allowed the navy to stay at sea for much longer without the need for cleaning and repairs to the hull. In addition, the copper increased boat speed and assisted in bullet-proofing, which further justified the purchase with the impending American Revolutionary War (1775-1783).

The Royal Navy set about coppering the bottoms of their entire fleet. By 1782, eighty-two capital ships had been copper sheathed, and Lord Sandwich, the First Lord of the Admiralty, was enthusiastic about the results, writing:

“...Copper Bottoms need fear nothing...”

Over time, “Copper Bottom” became a term of endearment used to describe someone who is thoroughly reliable, trustworthy and certain not to fail, just like the ships it protected.

Copper Bottom Craft Distillery has embraced the Copper Bottom legacy and is committed to producing spirits that exemplify it.

## Rotarians Making a Difference Across the World

Anil Srivatsa drives an SUV plastered with stickers boasting slogans like “Kidney donors are sexy!” across India.

His mission? To teach as many of the country’s 1.4 billion people as he can about the importance of organ donation. Srivatsa’s journey started with donating his kidney to his brother, a neurosurgeon and member of the Rotary Club of Bangalore, India. Now he’s raising awareness, challenging cultural barriers, and working to end the global organ shortage.

### Now You Know!

## The First Four Rotarians

Rotary's founder, Harris, was born in Racine, Wisconsin, USA, on 19 April 1868. He was raised by his paternal grandparents in Vermont and attended the University of Vermont, Princeton, and the University of Iowa. Harris, a lawyer, was Rotary president from 1910 to 1912 and a member of the Rotary Club of Chicago until his death on 27 January 1947.

Loehr, a mining engineer, was born on 18 October 1864 in Carlinville, Illinois, USA. He was a Rotarian for only a few years, never holding office at the club or international level. But that first Rotary meeting was held in his office, Room 711 of the Unity Building in downtown Chicago. He died in Chicago on 23 May 1918.

Shorey, a merchant tailor, served as recording secretary during the club's first year. He was a Rotarian for only a few years, too. He was born in Maine, USA, in August 1862 and died in March 1944.

Schiele, a coal dealer, served as the Chicago club's first president in 1905 and Rotary International's treasurer from July to December 1945. Born in Terre Haute, Indiana, USA, in June 1870, Schiele attended Terre Haute Business College and served in the U.S. Army during the Spanish-American War. He was president of the Schiele Coal Company from 1902 until his retirement in 1939. He and Harris became lifelong friends and lived near each other on the South Side of Chicago. Schiele died on 17 December 1945 and is buried near Harris at Mount Hope Cemetery.

Originally from Michigan, Ruggles was a graduate of Northwestern University in Evanston, Illinois, and joined Rotary at its second meeting. He was treasurer of the Chicago club during its first year, club president from 1908 to 1910, and a Rotary director from 1912 to 1913. He is known for having introduced singing to Rotary club meetings. His printing company, H.L. Ruggles & Co., printed the first issue of [The National Rotarian](#) and the first Rotary songbook. He died on 23 October 1959, an honorary member of seven clubs in addition to his home club, the Rotary Club of Chicago.
