District Training Assembly Information THIS WEEKEND!

Rotary

Greeting Rotarians,

Reminder, the time is upon us to gather together virtually and learn more about Rotary, our roles in Rotary, and learn new skill sets to help our clubs thrive, grow and prosper.

Attached is the schedule for our Virtual District Training Assembly Saturday, May 8th from 9:00 until 1:00, with quick hyperlinks to each of the sessions for this weekend's training. I have included the links below as well, but please refer to the PDF for detailed times for each breakout session.

All incoming officers, membership chairs, and foundation chairs are encouraged to attend and the event is also open to all interested club members. There is no registration for the event. Please share the schedule with all of your members.

We will all meet in one large zoom call and talk about exciting things for this Rotary New Year. Our Guest Speaker will be PIP Barry Rassin who will speak on the newest area of focus the Environment and he will also give us a an update on Hurricane Dorian Relief efforts.

We will all then leave that Plenary Zoom Meeting and attend one of the four tracks we have setup for your viewing pleasure. The 4 tracks are Club Admin, Club Finances, Membership, and Foundation. If you see something in a different track at a different time please feel free to drop out of one zoom track and drop into the next zoom track at a different time and back again should that be your educational plan.

If you want to be at multiple session at the same time and can't not to worry, we will record all sessions and tracks and place them on the District Your Tube page for viewing at a later time.

Please make sure that you do not share the Zoom links on social media and make sure that your members are aware of this as we would like to avoid any issues with "Zoom bombing."

We look forward to seeing everyone there!

PETS District Breakouts Friday, May 7 @ 6:30pm Only for AG2, President Elects & their partners <http://bit.ly/RotaryP>

Register Today!

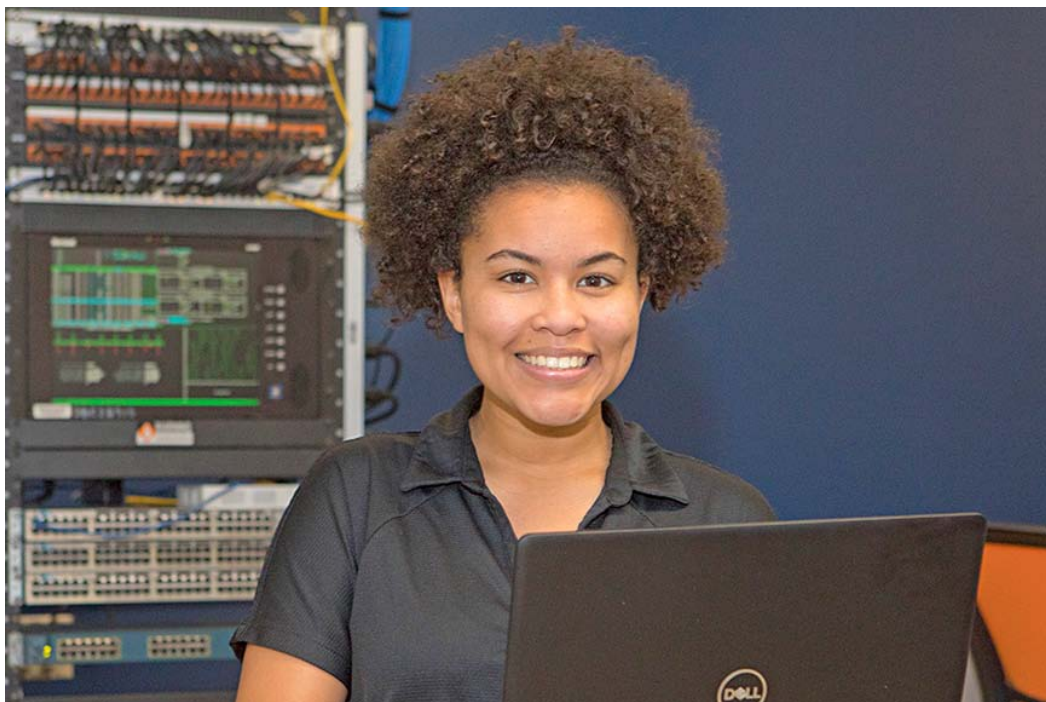

Register today for this year's virtual convention! There's something for everyone: Network and meet new partners in service. Attend breakout sessions covering topics like developing leadership skills or protecting the environment.

Have fun with activities like virtual cooking classes, a 5K walk or a DJ dance party. <https://on.rotary.org/3aZeBHq>

News of Note

By Amy Workowski on Saturday, May 8, 2021

In its spring 2021 rankings, Best Value Schools has placed Daytona State College No. 2 in the nation on the list for Best 20 Schools for an Online Electrical Engineering Degree, and No. 3 among the top electronic engineering programs overall. It's the third time during the current academic year that Daytona State has earned a high ranking from the online publication.

On the list covering online programs, Daytona State was the only Florida state college to make the top 20, with the remaining schools either state or private universities. DSC finished second only to Florida International, though the publication noted tuition at DSC was less than half that of the larger state university located in Miami, and DSC's tuition was one third the average cost of all the schools mentioned in the ranking.

In the overall ranking for Best Schools with an Electronic Engineering Degree, Daytona State was third on another list predominantly comprised of state universities. The college again had the lowest tuition for its BSET program among that group, significantly below the average cost of similar programs at the other schools which appeared in the ranking.

Rankings were determined using such factors as in-state tuition, average class size and return on investment.

Daytona State offers its Bachelor of Science in Engineering Technology as a standalone program or with a concentration in Electrical Engineering Technology. It is fully accredited by the Accreditation Board for Engineering and Technology, which verifies a student's education meets the global standard for technical education and supports professional licensure, registration and certification.

Electronic engineering allows people to work with new, practical technology in order to improve the systems and devices used by people in a wide variety of industries across the world, including digital and emerging technologies. The average pay for an electronic engineering technician with an associate's degree is \$31.38 per hour, or around \$65,260 annually. With a bachelor's degree, that pay increases to around \$98,000 per year.

Last fall, Daytona State was ranked No. 2 by the same publication on its list of Florida's most affordable colleges, and was also ranked among the top online college and university programs in Florida overall.

The Four Way Test

“

Is it the truth?

Is it fair to all
concerned?

Will it build goodwill
and better friendships

Will it be beneficial to
all concerned?"

”
