Rotary Club tours TekTone

Members of the Rotary Club of Franklin Daybreak took their meeting on the road on Tuesday morning, April 22, as they toured TekTone of Franklin.

TekTone is a family-owned business.

"We consider our employees to truly be part of our family, working towards a common goal. We strive to continually improve our processes by actively encouraging and recognizing ideas from all employees," said Johnny Mira-Knipple, President and CEO of TekTone.

TekTone products are designed and built in their FDA-registered, state-of-the-art manufacturing facility in Franklin. Operating for more than 50 years, they provide their customer base around the world with world-class support, and have a strong commitment to product design. All healthcare products are designed, manufactured and tested in the USA, while all software is written and owned by TekTone.

TekTone has its own in-house engineering department that is constantly working to use new innovative technology to improve our products, and a primary focus organization-wide is Continuous Improvement of service, quality, and processes.

Located in the Macon County Industrial Park, TekTone employs approximately 85 associates.
