## HEALTH AND HAPPINESS - presented by Dr Johnsen

### Weekly Program - Wendy Growcock from the Stanly County Health Department

Wendy Growcock addressed the club and presented the results from the Health Department's Community Health Assessment, which includes priorities, areas of focus, prevention services, barriers to services, potential solutions, and community resources relating to community health.

Wendy reported that Stanly County has seen a 30% reduction in overdoses (while the State of NC overall has seen an increase) due to the implementation of programs such as Project Lazarus, funded in part by a \$1 million grant.
