- Steve Curtis Hall  
August 10th
- Chris M. Nagle  
August 10th

## This Week at Rotary Dr. Amanda Williard, UNCW

Dr. Amanda Southwood Williard leads the Williard Lab at the University of North Carolina Wilmington. Research in the Williard Lab focuses on understanding how marine reptiles function in their environment. The lab employs both field-based and laboratory-based approaches to investigate the physiological and behavioral responses of marine reptiles to changes in temperature and salinity. The team values the importance of objective scientific research in the conservation of threatened and endangered species and collaborates with government agencies, academic institutions, and non-profit organizations to promote effective management strategies based on the best available data.

Dr. Williard received her BSc in Marine Biology from Auburn University in 1993, and her MSc and PhD in Zoology from the University of British Columbia in Vancouver, Canada, in 1997 and 2002, respectively. She conducted post-doctoral research at the NOAA Pacific Island Fisheries Science Center in Honolulu, Hawaii, and joined the faculty in the Department of Biology and Marine Biology at the University of North

Carolina Wilmington in 2005. Her research interests broadly encompass the energetics and thermal physiology of reptiles.

Be sure to attend tomorrow to see Brent's breakfast surprise.

---

## Meals on Wheels

For the second week in a row, Andy won the raffle and got to pick a card out of the deck with \$750 on the line. He looks happy here, but it apparently was before he saw the card he picked. See if you can make it 3 in a row Andy. To everyone else, you've got a chance if you attend the meeting and buy some raffle tickets.
