Last Week's Program

Kate Konopasek with Toray Composite Materials America, told the Club their company is 100 years old and operates in 29 countries with 47,000 employees. The plant in Duncan was opened in 2015 and has 130 employees who work with carbon fiber for clients like Boeing. They are undertaking a large expansion and will soon add 100 new employees.

Upcoming Programs

Nov. 14 District Governor - Renee Stubbs
Nov. 21 Thanksgiving Program - Yossi Liebowitz

Who Am I?

1. The rural farm I lived on until I was 8 years old did not have electricity or indoor plumbing. We got a telephone (8 party line) before electricity.
2. I met the inventors of the transistor, the solar cell, and lasers on the same day in 1965.
3. I have never made a hole in one, but I made an Albatross (2 on a par 5) in 2001.
